

Bee happy at Madley Primary School

Wonderfully, over the past few months, our class teacher, eco teacher and Mrs Marlow have done some beekeeping training so our school can get bees. Our school The school, who celebrated World Bee Day, has raised money to buy some bee suits. The school introduced the bees on the 21st June 2024 after Duncan caught a swarm.

The bees being put in their bee-utiful hive.

The school children have learnt that bees impact
On our eco system in a very good way so
Everyone should have an understanding of bees.

With excitement, the school bees arrived, which are doing beetastick in there know home. The bees are great like they should bee. From the teacher's bee training, the teachers met Duncan, who gave us the swarm. He said that, "My favourite part about having bees, apart from the yummy honey, is watching them visit the flowers in the garden."

The children, who are excited about the bees, are patiently waiting for the day they are able to get their beekeeper suits on. The headteacher (Mr Batstone) stated that, "It will be excellent to see the children observing the bees up close. They will be taking care of them and watching Them grow and progress. The children will learn A lot.
